

SECTION 6

6.01 MATERIALS AND TESTING:

Detailed technical specifications for purchase or approval of materials are included in the Materials Specifications of these Standards. All materials shall conform to the Materials Specifications and to all limitations on acceptable makes and styles.

All materials furnished shall be new and undamaged. Everything necessary to complete all installations in accordance with the Engineering Standards of Denver Water shall be furnished and installed whether shown on approved drawings or not; and all installations shall be completed as fully operable, functioning parts of the Denver water system.

Where mains are extended by Applicants, it shall be their responsibility to provide all materials necessary for the installation. No materials will be supplied to the Applicant by Denver Water.

Acceptance of materials, or the waiving of inspection thereof, shall in no way relieve the Applicant of the responsibility for furnishing materials meeting the requirements of the Materials Specifications.

New water industry products or materials will be tested if it is the opinion of the Engineer that the product or material has some merit. Denver Water will establish the criteria for testing and evaluating the product. Denver Water reserves the right to accept or reject any product or material regardless of the test results. See Appendix A, PROCEDURE FOR EVALUATION OF MATERIALS.
